Career Objective

I want to take on the challenge of web development. Where I can refine my skill and expand my knowledge. As an engineering student, I know how to handle situations during complicated times.

Skill

Frontend: React, JavaScript, HTML,CSS, Tailwind, Bootstrap, Firebase, React Hook Form
Backend: Express, MongoDB, JWT (Json Web Token).
Tools & Tech: VSCode, GitHub, Netlify.
Programming Language: C, C++, Python

Projects

UpScale ReSale [Resale Website] **[[Live Site](#)] [[Client Side](#)] [[Server Site](#)]**

- As a seller, you can add product and see your products and you can also advertise your products that show the home page and also update your products when it is sold.
- As an Admin he/she controls also the user, seller, buys and sees all information.
- Admin can verify the user and seller and if he/she wants to delete the user or seller he/she can do it. Admin can see the reported product and also see which seller add the product. If he/she wants to delete the product he/she can do it.

Used Technology: React.js, JavaScript, Tailwind CSS, DaisyUi, Express, Firebase, MongoDB, Stripe, Vercel

RTR Cloud Kitchen [Food Review Website] **[[Live Site](#)] [[Client Side](#)] [[Server Site](#)]**
